

Project Title:	Finchley & Frognal Railway Station
Client:	Network Rail - Anglia
Date of Work:	March 2011

Project description

Works comprised of the design and construction of new triple flight stair and bridge parapet.

This required the removal of existing brick parapet above track/OLE and re-construction with steel parapet.

Removal of the existing staircase to platform 2 and replace with new steel staircase.

The stairs to P1 were also substantially repaired as the supporting cleats to the timber stair treads were badly corroded. New non slip treads were installed and DDA compliant handrail systems.

Project Constraints

Public Interface

Work at high level

Access constraints

Liaison with residents & businesses in regards to a road closure for use of crane.

Plant and material logistics
