

Project Title:	Harringay Green Lane Railway Station
Client:	Dyer and Butler
Date of Work:	January 2017

Project description

The scheme comprised of two identical platform extensions approx. 14m in length. The steel substructure was in a cranked format so a 40mm frp deck was laid directly on to the steelwork.

In addition we installed a stair to each platform . Keeklamp type handrails were installed to the end of the platform and onto the stairs.

Project Constraints

- Ecology
- Planning
- Public Interface
- Material delivery logistics
