

Project Title:	Andover Bridge
Client:	Highways England
Date of Work:	Jan 2017

Project description

Extensive brickwork, re-pointing and coping repairs to a disused railway bridge in Andover, Hampshire.

A scaffold platform was erected to gain safe high level access to the entire structure.

Traffic Management was implemented on the carriageway over the bridge to control vehicular movement and protect the workforce.

Defective brickwork and pointing was cut out and rebuilt using bricks of matching strength, size and colour to all elevations of the structure.

Approximate duration of the work was 16 weeks.

Project Constraints

Traffic Management.

Work at high level.

Poor condition of structure.

Sourcing bricks of matching size/colour.

Public Interface.

3rd party negotiations (landowners).
